📇 ABOUT ME

Hardworking Software Developer skilled in building scalable APIs, optimizing performance, and designing intuitive user interfaces. Recognized for delivering high-quality solutions through strong problem-solving & teamwork.

🎓 EDUCATION

Master of Science in Information Technology - 2023
University of Mumbai
CGPA: 8.73 CGPA

Bachelor of Science in Information Technology - 2021
University of Mumbai
CGPA: 9.05 CGPA

💼 EMPLOYMENT HISTORY

PHP Developer   November 2023 – November 2025
Inovant Solutions (Mumbai, India)

- Designed and developed the entire backend admin panel using PHP Yii2, integrating a responsive admin theme with role-based access control (RBAC).
- Implemented management reports, dashboard analytics, audit logs, and various CRUD modules to support business operations.
- Designed and implemented RESTful API endpoints for seamless client-server communication and secure data handling.
- Utilized tools like Postman and profiling techniques to identify and resolve performance bottlenecks, reducing server response times.
- Integrated third-party services (e.g. SMS, and email).
- Troubleshoot bugs, optimized SQL queries, and handled complex business logic.
- Maintained and refactored legacy PHP code, improving code quality, fixing bugs, and upgrading outdated components to align with modern development standards.
- Ensured best practices in security, validation, and testing.

🧠 SKILLS

Languages
PHP, JavaScript, HTML5, CSS3, Python, SQL.

Databases/Tools
MySQL , PhpMyAdmin, SQL Workbench.

Server & Hosting
Apache, NGINX, Linux, AWS, WAMP, XAMPP.

APIs & Architecture
MVC, RESTful APIs, Third-party API integrations.

CMS
Wordpress (Elementor)

Frameworks/Libraries
Yii2, jQuery, Bootstrap, AJAX, PJAX.

Version Control & Collaboration
Git, GitHub.

Authentication & Authorization
JWT, RBAC.

Soft Skills
Communication, problem-solving, teamwork, leadership, cross-functional collaboration, time management

📂 PROJECTS

DIGITAP: E-commerce Project

DIGITAP is the easiest way to share all your social and contact information in a smart, contactless, and memorable way, enabling users to effortlessly connect and engage with others through a seamless digital experience that combines convenience with modern technology.

Key Contributions:
- Designed and developed backend modules and RESTful APIs to manage user data and platform functionality.
- Managed and optimized MySQL databases, ensuring data integrity, security, and performance.
- Implemented core e-commerce features, including user profiles, digital card management, and social link integration.
- Designed and enhanced user interfaces to deliver a smooth, responsive, and user-friendly experience.
- Integrated third-party services and ensured seamless data exchange across the platform.
- Collaborated with cross-functional teams to test, debug, and maintain high-quality application standards.

RIMASHAAR JEWELLERY: E-commerce Project

A jewellery shop application where users can buy products online and send gifts to others, featuring additional functionalities to enhance the shopping experience.

Key Contributions:
- Developed and maintained web application modules using PHP and the Yii2 framework.
- Created and managed REST APIs for product listing, orders, and gift delivery features.
- Designed dynamic forms and user-friendly interfaces to improve customer experience.
- Managed and optimized MySQL databases to ensure data accuracy and performance.
- Debugged and resolved application issues to maintain system stability.

ZWARA: E-commerce / Food Delivery Project

A food delivery application developed for Kuwait, enabling users to browse restaurants, place online food orders, and track deliveries through a seamless and user-friendly digital platform.

Key Contributions:
- Developed and maintained backend modules using PHP and the Yii2 framework.
- Designed dynamic forms and user interfaces to support food ordering and delivery workflows.
- Implemented and managed MySQL database interactions for orders, users, and restaurant data.
- Identified, debugged, and resolved application issues to ensure smooth platform performance.
- Participated in code reviews and followed best coding practices to maintain code quality
- Collaborated with cross-functional teams and tested APIs using Postman.

SNAFI: E-commerce Project/ Service Based Application

A laundry service application developed for the Kuwait market, enabling users to schedule laundry services, manage orders, and track service status through a simple and efficient online platform.

Key Contributions:
- Developed backend functionalities using PHP and the Yii2 framework to support laundry service operations.
- Created and integrated RESTful APIs for order management, service scheduling, and user interactions.
- Managed and optimized MySQL databases to ensure reliable data storage and retrieval.
- Collaborated with QA teams on testing scenarios and defect reporting to maintain application quality.
- Debugged and resolved backend issues to improve system performance and stability.
- Worked with team members using Git and tested APIs using Postman.
